“Processes of Book Publishing” Workshop report

Date: 09/04/2019

Academic Session : 2018-19

Program: Workshop “Processes of Book Publishing”

Participation: College Professor Class Guide: Dr.

Total workshop participants : 08

Devanand Khobragade Head of Marathi Department

Program report

A workshop on “Book Publishing Process” was organized in the college by the Marathi department of the college for the faculty. As the faculty need to write various types of research essays for their professional promotion CAS as well as writing a book for their subject, this workshop was organized so that the faculty have knowledge about it. .

Purpose of the workshop

1. The faculty should know the entire process of book publishing.
2. To encourage faculty to publish books.
3. To overcome the difficulties faced by the professor while publishing the book to the class.
4. To provide information regarding the process of publication of e-books.
5. Providing information on how to obtain ISBN NO.

Results of the workshop

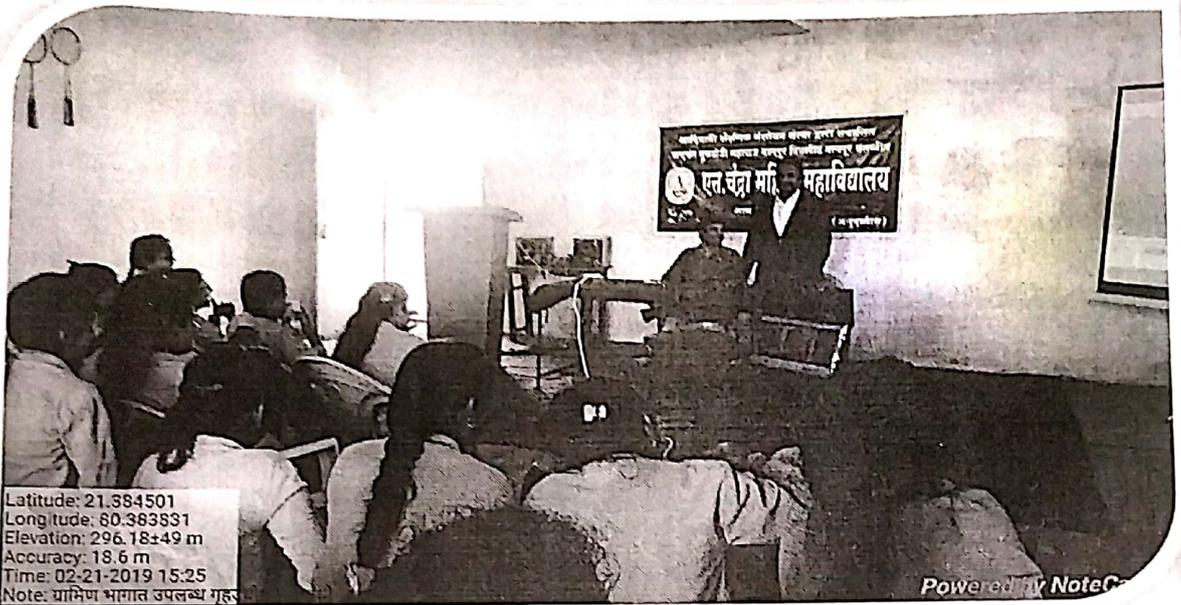

1. The relationship between writing and publishing became clear.
2. The difficulties encountered in publishing the book were resolved. 3. Obtained information required to set up own publishing house.
4. The process before the publication of the book was informed.
5. After the book was published, the process of distributing it became known.

Intellectual Property

Rights Workshop Report Date:

05/07/2020 to 07/03/2020

Academic Year: 2019-20

Activity: Workshop on "Intellectual Property Rights"

Participant: Teaching staff members of college.

Total Participant: 09

Presented By: 1. Prof. Arvind Bhagat (Librarian, M.B.Patel College Salekasa)

2. Prof. Kamlesh Patil (Librarian, S.Chandra Mahila Mahavidyalaya. Amgaon)

Brief Report:

"Intellectual Property Rights" is to encourage the creation of wide variety of intellectual goods and artistic work and protect it. Government of India has taken a lot of initiatives in framing the laws related to Intellectual Property. We thought it better to have overall discussion and deliberation on this important issue along with industry-academia initiatives by organizing a workshop. It is a category of property that includes intangible creation of human intellect and primarily encompasses, copyright, patent and trademarks. IPR is the protection of creative ideas, innovations, research and development. It is the need of an hour in every field of life.

Topic Covered in workshop

Copyright protects the published and unpublished works of specified period of times like literary work(email & newspaper articles) dramatic work (drama play), musical work (songs), artistic work (paintings, photographs & images), film (videos & cinematic performance), sound recording (oral history tape & recording of lecture), broadcasts (TV & radio) and typographic work (arrangement of website & translation) distinctive signs.

Plagiarism is the practice of taking someone else's work or ideas and passing them off as one's own and checked by URKUND. We will also bring the discussion on employment through Industry-Academia collaboration. Considering the above fact in mind this workshop on this theme is organized.

Patent is an exclusive right granted by a country to the owner of an invention to make, use, manufacture and market the invention. Conditions for granting a patent are a) meet the criteria of novelty, b) involve an inventive step and c) be capable of industrial application.

Objectives of Workshop on Intellectual Property Rights

The main purpose of IPR is to encourage the creation of wide variety of intellectual goods, artistic work and protect it. It is a category of property that includes intangible creation of human intellect and primarily encompasses, copyright, patent and trademarks. IPR are the protection of creative ideas, innovations, research and development. It is the need of an hour in every field of life.

PROGRAMME PROFORMA

Name of the Programme:	Intellectual Property Rights
Date of Programme:	08.09.2021

Objectives of the Programme:	<ol style="list-style-type: none">1. To Progress and the good of humanity remain in the ability to create and invent new works in the field of technology and culture.2. To literate ^{literate} about IP protection encourages publication, distribution, and disclosure of the creation to the public, rather than keeping it a secret.3. Understand Promotion and protection of intellectual Property promote economic development, generates new jobs and industries, and improves the quality of life.
------------------------------	--

Name of the Teacher:	Dr. Lalitkumar G. Thakur
----------------------	--------------------------

Report:

Intellectual Property (IP) deals with any basic construction of human intelligence such as artistic, literary, technical or scientific constructions. Intellectual Property Rights (IPR) refers to the legal rights granted to the inventor or manufacturer to protect their invention or manufacture product. These legal rights confer an exclusive right on the inventor/manufacturer or its operator who makes full use of it's his invention/product for a limited period of time.

Intellectual property rights are monopoly rights that grant temporary privileges to their holders for the exclusive exploitation of income rights from cultural expressions and inventions. There must be good reasons for a society to grant such privileges to some of its individuals, and so proponents of these rights provide us with three widely accepted justifications to protect today's inter-global intellectual property rights.

It is clear that the management of IP and IPR is a multi-disciplinary task and calls for many different functions and strategies that need to be aligned with national laws and international treaties and practices. It is no longer fully driven from the national point of view.

Different forms of IPR demand different treatment, handling, planning and strategies, and individuals' engagement with different domain knowledge such as science, engineering, medicine, law, finance, marketing, and economics. Intellectual property rights (IPR) have social, economic, technical and political implications.

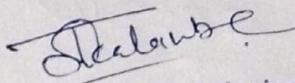

Leading rapid technology, globalization and fierce competition to protect against infringement of innovations with the help of IPRs such as patents, trademarks, service marks, industrial design registrations, copyrights and trade secrets. But there is still a violation of intellectual property rights. The government is also taking measures to stop them. There are laws regarding the prevention of infringement of intellectual property rights.

Report:

Intellectual Property (IP) deals with any basic construction of human intelligence such as artistic, literary, technical or scientific constructions. Intellectual Property Rights (IPR) refers to the legal rights granted to the inventor or manufacturer to protect their invention or manufacture product. These legal rights confer an exclusive right on the inventor/manufacturer or its operator who makes full use of it's his invention/product for a limited period of time.

Intellectual property rights are monopoly rights that grant temporary privileges to their holders for the exclusive exploitation of income rights from cultural expressions and inventions. There must be good reasons for a society to grant such privileges to some of its individuals, and so proponents of these rights provide us with three widely accepted justifications to protect today's inter-global intellectual property rights.

It is clear that the management of IP and IPR is a multi-disciplinary task and calls for many different functions and strategies that need to be aligned with national laws and international treaties and practices. It is no longer fully driven from the national point of view.

Different forms of IPR demand different treatment, handling, planning and strategies, and individuals' engagement with different domain knowledge such as science, engineering, medicine, law, finance, marketing, and economics. Intellectual property rights (IPR) have social, economic, technical and political implications. Entrepreneurship and Innovation minors will be able to sell themselves and their ideas. Students master oral and visual presentation skills and establish a foundation of confidence in the skills necessary to cause others to act.

Entrepreneurship and Innovation minors will be able to find problems worth solving. Students advance their skills in customer development, customer validation, competitive analysis, and iteration while utilizing design thinking and process tools to evaluate in real-world problems and projects.

Entrepreneurship and Innovation minors will be able to mobilize people and resources. Students identify and secure customers, stakeholders, and team members through networks, primary customer research, and competitive and industry analyses in order to prioritize and pursue an initial target market in real-world projects.

Entrepreneurship and Innovation minors will be able to create value. Students are able to create presentations and business plans that articulate and apply financial, operational, organizational, market, and sales knowledge to identify paths to value creation through 1) company formation (for-profit); 2) social innovation (nonprofit); or 3) intellectual property licensing.

Entrepreneurship and Innovation minors will develop and cultivate endurance. Students increase their awareness and deliberately practice the skills and disciplines necessary to increase confidence and agency; foster self-efficacy and self-advocacy; improve communication and problem-solving skills, manage strong impulses and feelings; and identify personal purpose.

Objectives

१. प्राध्यापकांना संशोधन करतांना Research Methodology या विषयाबाबत माहिती देणे.
२. Hypothesis कसे लिहायचे याबाबत माहिती करून देणे.
३. Hypothesis कसा निवडायचा याबाबत जाणिव करून देणे.
४. दर्जेदार संशोधन व्हावे याबाबत प्राध्यापकांना प्रशिक्षण देणे.

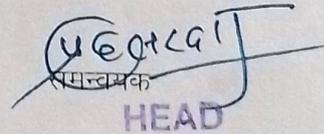

तसेच संशोधकांना ६ मुदयाबाबत माहिती देणे. १. स्वतःला प्रश्न विचारा २. प्राथमिक संशोधन करा. ३. तुमची व्हेरिबल्स करा. ४. जर तर विधान म्हणुन वाक्यप्रचार करा. ५. तुम्ही निवडलेल्या गृहितकाचे समर्थन करण्यासाठी माहिती गोळा करा. ६. आत्मविश्वासाने लिखाण करा.

Programme Outcomes -

- १- प्राध्यापकांना Research Methodology या विषयाची थोडी माहिती झाली.
- २- प्राध्यापकांना Hypothesis लिहतांना कोणकोणत्या सहा मुदयाचा उपयोग होतो याबाबत जाणिव झाली.
- ३- मार्गदर्शकांनी Hypothesis लिहतांना कोणकोणत्या ६ बाबी आवश्यक आहेत याबाबत प्राध्यापकांना जाणिव झाली.

Academic Session 2021-2022

PROGRAMME PROFORMA

Name of the Programme:	Intellectual Property Rights
Date of Programme:	08.09.2021

Objectives of the Programme:	<ol style="list-style-type: none">1. To Progress and the good of humanity remain in the ability to create and invent new works in the field of technology and culture.2. To ^{literate} literature about IP protection encourages publication, distribution, and disclosure of the creation to the public, rather than keeping it a secret.3. Understand Promotion and protection of intellectual Property promote economic development, generates new jobs and industries, and improves the quality of life.
------------------------------	--

Name of the Teacher:	Dr. Lalitkumar G. Thakur
----------------------	--------------------------

Report:

Intellectual Property (IP) deals with any basic construction of human intelligence such as artistic, literary, technical or scientific constructions. Intellectual Property Rights (IPR) refers to the legal rights granted to the inventor or manufacturer to protect their invention or manufacture product. These legal rights confer an exclusive right on the inventor/manufacturer or its operator who makes full use of it's his invention/product for a limited period of time.

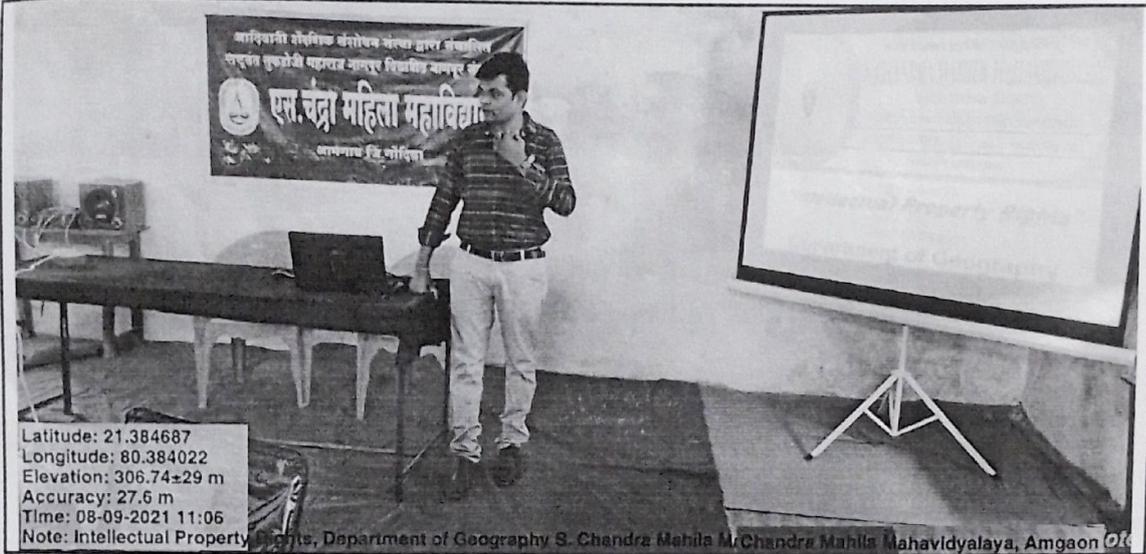

Intellectual property rights are monopoly rights that grant temporary privileges to their holders for the exclusive exploitation of income rights from cultural expressions and inventions. There must be good reasons for a society to grant such privileges to some of its individuals, and so proponents of these rights provide us with three widely accepted justifications to protect today's inter-global intellectual property rights.

It is clear that the management of IP and IPR is a multi-disciplinary task and calls for many different functions and strategies that need to be aligned with national laws and international treaties and practices. It is no longer fully driven from the national point of view.

Different forms of IPR demand different treatment, handling, planning and strategies, and individuals' engagement with different domain knowledge such as science, engineering, medicine, law, finance, marketing, and economics. Intellectual property rights (IPR) have social, economic, technical and political implications.

Leading rapid technology, globalization and fierce competition to protect against infringement of innovations with the help of IPRs such as patents, trademarks, service marks, industrial design registrations, copyrights and trade secrets. But there is still a violation of intellectual property rights. The government is also taking measures to stop them. There are laws regarding the prevention of infringement of intellectual property rights.

Outcome of the Programme:

There are many benefits of acquiring intellectual property rights. For example, protecting your IP may result in:

1. The increased market value of your business – IP can generate income for your business through licensing, selling or commercializing protected products or services. This, in turn, can improve your stock market or increase your profit. In the case of a sale, merger or acquisition, registered and protected IP assets can increase the value of your business.
2. Convert ideas into profitable assets – IP can help to convert creative ideas into commercially successful products and services. For example, licensing your patent or copyright can result in a steady stream of royalties and additional income that can result in profitable assets.
3. Market the products and services of the business – IP is necessary to create an image for your business like trademark, logo, or design of your product. So, it will help in differentiating the product and advertise and promote it to the customers.
4. Increase export opportunities for the business – IP can increase the competition in export markets. One can use their brands and design for marketing foreign goods and are looking for franchising agreements with foreign companies or to export your patented products. Consumers won't be confident buying means without products or reliable services, international trademark protection and enforcement machinery to discourage counterfeiting and piracy.

Report:

Intellectual Property (IP) deals with any basic construction of human intelligence such as artistic, literary, technical or scientific constructions. Intellectual Property Rights (IPR) refers to the legal rights granted to the inventor or manufacturer to protect their invention or manufacture product. These legal rights confer an exclusive right on the inventor/manufacturer or its operator who makes full use of it's his invention/product for a limited period of time.

Intellectual property rights are monopoly rights that grant temporary privileges to their holders for the exclusive exploitation of income rights from cultural expressions and inventions. There must be good reasons for a society to grant such privileges to some of its individuals, and so proponents of these rights provide us with three widely accepted justifications to protect today's inter-global intellectual property rights.

It is clear that the management of IP and IPR is a multi-disciplinary task and calls for many different functions and strategies that need to be aligned with national laws and international treaties and practices. It is no longer fully driven from the national point of view.

Different forms of IPR demand different treatment, handling, planning and strategies, and individuals' engagement with different domain knowledge such as science, engineering, medicine, law, finance, marketing, and economics. Intellectual property rights (IPR) have social, economic, technical and political implications. Entrepreneurship and Innovation minors will be able to sell themselves and their ideas. Students master oral and visual presentation skills and establish a foundation of confidence in the skills necessary to cause others to act.

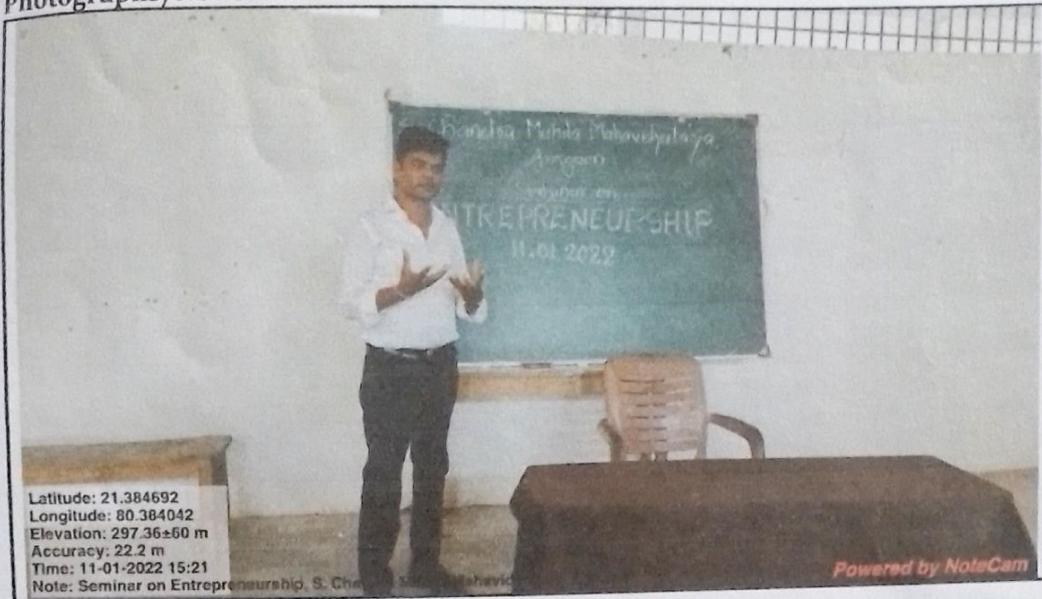

Entrepreneurship and Innovation minors will be able to find problems worth solving. Students advance their skills in customer development, customer validation, competitive analysis, and iteration while utilizing design thinking and process tools to evaluate in real-world problems and projects.

Entrepreneurship and Innovation minors will be able to mobilize people and resources. Students identify and secure customers, stakeholders, and team members through networks, primary customer research, and competitive and industry analyses in order to prioritize and pursue an initial target market in real-world projects.

Entrepreneurship and Innovation minors will be able to create value. Students are able to create presentations and business plans that articulate and apply financial, operational, organizational, market, and sales knowledge to identify paths to value creation through 1) company formation (for-profit); 2) social innovation (nonprofit); or 3) intellectual property licensing.

Entrepreneurship and Innovation minors will develop and cultivate endurance. Students increase their awareness and deliberately practice the skills and disciplines necessary to increase confidence and agency; foster self-efficacy and self-advocacy; improve communication and problem-solving skills, manage strong impulses and feelings; and identify personal purpose.
